

# Glass Gardener Collection

We are an importer and purveyor of fine English Greenhouses. Our selected products have been manufactured by the same company in England since 1930, and are the most popular hobby greenhouses in Europe. Our decision to import this product was based upon providing our customers with the best possible residential greenhouses available, based on quality construction, tested operation, attractiveness and affordability. Out-fitted with 1/8" tempered safety glass these greenhouses are the classic example of, "simply the very best, for less." A Glass Gardener Greenhouse will not only enhance your gardening experience but will provide you with hours of enjoyment as a year-round retreat.

 Ground Cover – nursery grade floor material  
 63% Shade Cloth – placed on afternoon sun side of greenhouse  
 T-Bolts & Basket Hanger Sampler – shelf/basket hangers  
 Delivery – free delivery within Puget Sound region, other shipping available

### Installing the Greenhouse

All greenhouses are delivered to you in kit form with well-written and pictorial instructions along with a "Helpful Tips" sheet prepared by us to assist you. Based on the size of greenhouse, you can expect to spend between 10 to 20 hours installing your greenhouse. We are always available to assist with specific questions.

Should your circumstances require it, we offer complete installation of your greenhouse. This service is available for \$425 to \$525 depending on the specific model and includes the 4" x 6" pressure treated wood for the foundation. You provide the gravel.

### Painted Aluminum Frame

All of our greenhouse frames can be painted using a process known as Powder Coating. Working with a premier Northwest powder coating company we can offer you over 50 colors to choose from. Cost for the complete powder coating process is \$350 to \$725 depending on the specific model. Additional information about this service is available upon request.

### Directions to The Glass Gardener

We are located at the Tacoma end of Pioneer Way East where it joins River Road just before I-5. If using I-5, we are 2 miles from Exit 135. Take Exit 135, follow signs to Puyallup via River Road. Go one half mile, then bear right at the first traffic light onto Pioneer Way East. We are approximately 1 mile on the right.

### Web Site Information

Visit our web site at [www.glassgardener.com](http://www.glassgardener.com) for additional information regarding our products and services, including examples of assembly instructions, helpful tip sheets and book recommendations. Forward our web site to a friend, we ship throughout the U.S.A.

### Using your Greenhouse Year-round

We consider the ability to use and enjoy your greenhouse 12 months a year extremely important. Heat in the summer is a killer of plant material and most greenhouses on the market today cannot provide sufficient natural ventilation. This is not the case with our greenhouses. We will show you how to maintain pleasurable summer temperatures (warm days and cool nights), for both you and your plants, by simply removing individual pieces of glass and placement of shade cloth.

### Tempered Safety Glass vs. Regular Glass

Tempered Safety Glass is five times more impact resistant than regular glass. If broken, regular glass breaks into large pieces creating an unsafe condition. Tempered Safety Glass disintegrates into thousands of small pieces if a break occurs. Tempered Safety Glass, unlike polycarbonate material, is considered a "forever" product.

### Choosing a Greenhouse Site

Our experience is that every yard presents different site considerations. It will be our pleasure to make specific recommendations about your site upon request. Your glass house will capture 100% of the available light during the winter months. During the winter the sun is your friend, but during the spring and summer the sun is your enemy. Since our models are attractive structures and a pleasure to be in, we recommend you place it as close to your home as possible. You will find that if it's convenient, you will use it successfully.

### Site Prep and Building the Greenhouse Base

All greenhouses must have a foundation (base) to support the structure, which must be square and level.

We recommend a base constructed from 4" x 6" ground treated timber with the 4" side on the ground and the 6" side pointing up. The base and greenhouse unit can then be placed in yards, on decks or other existing pads. The best method to level and prepare the site is with 3 inches of driveway gravel (5/8" minus, do not use pea gravel). Spread and level gravel beyond the outside dimensions of your greenhouse, then place the base on top of the gravel. This method provides easy installation, drainage and extra height to the greenhouse. We will provide you with a "Helpful Tips Sheet" which will explain the above information in detail for your specific model.

Models	Size* Width x Length x Height	1/8" Tempered Glass	Growing Area	Vents	Univent Included
Deck House 6x6	6'4" x 6'4" x 6'5"	\$1099	38sq.ft	1	1
Supreme 6x8, Curved	6'3 <sup>3</sup> / <sub>4</sub> " x 8'4 <sup>3</sup> / <sub>8</sub> " x 6'5"	\$1499	49sq.ft	1	1
Hexagonal	7'4" x 8'5" x 8'5"	\$1799	45sq.ft	1	n/a
Magnum 8x10	8'5" x 10'6" x 8'	\$2499	84sq.ft	4	2
Magnum 8x12	8'5" x 12'6 <sup>1</sup> / <sub>2</sub> " x 8'	\$2699	100sq.ft	4	2
Magnum 8x14	8'5" x 14'7" x 8'	\$2899	117sq.ft	4	2

\*Width & Length sizes are outside to outside base dimensions. Built to these dimensions, the frame will fit perfectly over it. Heights don't include base.
