

# Powder Coating Information

All of our greenhouse frames can be painted using a process known as powder coating. So what is powder coating? Powder coating is an advanced method of applying a decorative and protective finish to a wide range of materials and products. The powder used for the process is a mixture of finely ground particles of pigment and resin, which is sprayed onto a surface to be coated. The charged powder particles adhere to the electrically grounded surfaces until heated and fused into a smooth coating in a curing oven. The result is a uniform, durable, high-quality, scratch-resistant and attractive finish.

With so many colors to select from you can match the trim on your house or find that perfect color to enhance your garden. When ordering a powder coated greenhouse you'll need to figure on an extra week to get your frame powder coated. Pricing varies on the greenhouse model selected.

The color chips are only displayed to give you an overview of the color and finish selections available. The colors will be different based on your computer monitor, video card and color printer. We will be happy to work with you to make the selection that best fits your needs.

Models	Retail Price	Painted Frame
Deck House 6x6	\$999	\$350
Supreme 6x8, Curved	\$1399	\$450
Hexagonal	\$1675	\$450
Magnum 8x10	\$2299	\$600
Magnum 8x12	\$2499	\$650
Magnum 8x14	\$2699	\$725
